ABOUT EPS

International know-how, local commitment

Engineering Power Solutions (EPS) is a private company focused on engineering, project management, recruitment & manpower and training for demanding industrial and energy-sector projects. Service packages are tailored to each client's scope, schedule and location.

4

Integrated service lines

Engineering · Project Management ·
Recruitment & Manpower · Training

8

Core sectors

Oil & Gas · Petrochemical · Power & Energy ·
Renewables · Industrial · Infrastructure · Ports
& Shipping · Water & Utilities

How EPS supports project delivery

ENGINEERING

From concept to technical definition

Feasibility, due diligence, environmental impact, permitting, surveys, basic/FEED packages, tender evaluation, reverse engineering, risk assessment and CAPEX estimation.

PROJECT MANAGEMENT

Across every project phase

Home-office and site support through construction, erection, pre-commissioning, commissioning, start-up, operations and maintenance.

MANPOWER

Qualified personnel

Candidate sourcing, technical testing, interviews, skills evaluation and support with applicable mobilisation formalities.

TRAINING

Building capability

Technical documentation analysis, manual preparation, skills analysis, technical training and structured on-the-job training.

Why clients work with EPS

- ◇ **Multidisciplinary technical support** — engineering, project management, manpower and training under one roof.
- ◇ **Full lifecycle understanding** — from feasibility and FEED through commissioning, start-up and O&M.
- ◇ **HSE-Q at the centre** — procedures, risk analysis and bridge documents aligning client and authority requirements.
- ◇ **Flexible service packages** — tailored to each client's scope, schedule and location.
- ◇ **Client-focused execution** — value-added services that let clients concentrate on their core business.

HEADQUARTERS: Bucharest, Romania · OFFICE: Ankara, Türkiye · REGIONAL CONTACT POINTS: Tripoli · Almaty · Al-Khobar

SERVICES

Technical support across the full project lifecycle

Engineering

- (Pre-)feasibility studies
- Due diligence and environmental impact
- Permitting and site surveys
- Basic and FEED packages
- Tender documents and bid technical evaluation
- Reverse engineering
- HAZID / HAZOP / QRA
- CAPEX estimation ($\pm 15\%$)

Project Management Services

- Construction, fabrication and erection
- Pre-commissioning
- Commissioning and start-up
- Operations & maintenance
- Home-office and site support

Recruitment & Manpower

- Candidate sourcing against job descriptions
- Technical interviews and testing
- Skills evaluation to client guidelines
- Applicable immigration / visa / clearance support
- Local-law and conduct familiarisation

Training

- Technical documentation analysis
- Manuals preparation
- Skills analysis
- Technical training
- On-the-job training

Project lifecycle

Engineering → Construction / Erection → Pre-commissioning → Commissioning & Start-up → Operations & Maintenance

Typical engagement profiles

STUDIES & FEED

Engineering studies & project definition

Feasibility through FEED, risk assessment and CAPEX — a sound technical basis for decisions.

EXECUTION

Project management & site support

Project teams supporting home-office and site activities across every phase.

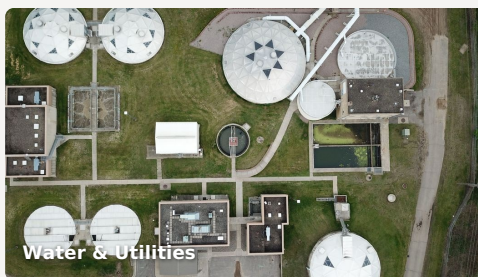

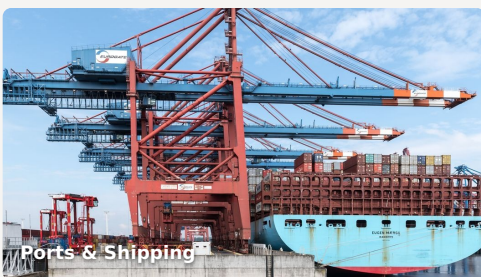

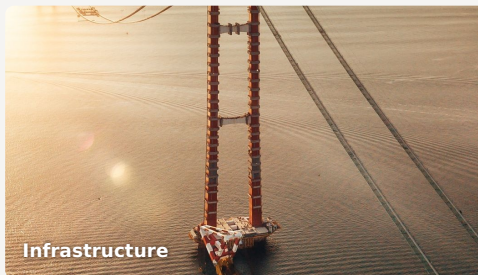

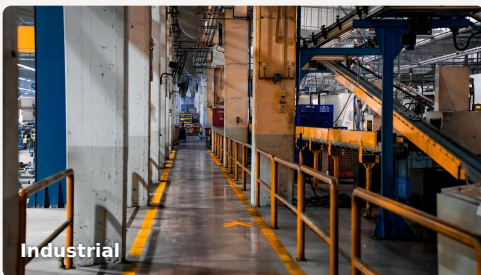

WORKFORCE

Technical manpower & training

Sourcing, testing and mobilising qualified personnel, with structured training.

SECTORS

Built for complex, regulated industrial environments

Safety, quality and disciplined execution

EPS embeds health, safety, environment and quality into the way work is planned, executed and verified.

HSE-Q pillars

- ◇ Documented procedures and processes
- ◇ Systematic risk analysis
- ◇ Bridge documents aligning client standards and authority requirements
- ◇ Compliance with applicable authority requirements
- ◇ Documented quality management
